#### "RFIP-R7" Data Dictionary Install on Trimble Geo XH Data Logger

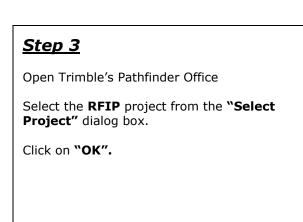

This document will provide direction for installing the "**RFIP-R7**" data dictionary on the Geo XH data logger and then delete the previous data dictionary. Followed by steps that will explain how to enable the "**Repeat**" and "**LOG LATER**" functions.

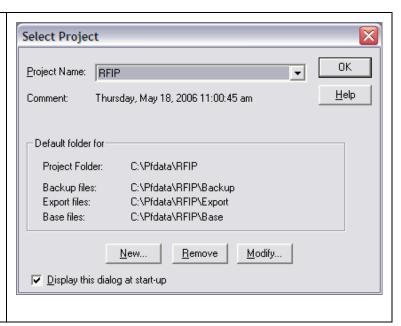

#### C:\AAWork\PFDATA\RFIP Step 1 File Edit View Favorites Tools Help Copy the new RFIP-R7 data dictionary file Address C:\AAWork\PFDATA\RFIP ✓ → Go "RFIP-R7" data dictionary to the office Date Modified Name -Size Type Folders computer in the following directory: Desktop Base File Folder My Documents 8/25/2009 11:39 / Export DTL0825e.TXT File Folder 8/25/2009 11:39 ■ My Computer HQA1353026 1 KB Text Document ★ 場 (A:) 3½ Floppy ➡ (C:) CDrive 8/25/2009 4:39 P C:\AAWork\PFDATA\RFIP RFIP\_R6.ddf 1.058 KB Trimble data dictionary... 11/6/2008 5:36 PM 1,047 KB Trimble data dictionary... 8/25/2009 12:46 ■ Control of the first of as shown in this screen. Attachmate Desktop EasyClean Favorites PFDATA **⊞** ada monuments\_ER My Documents E RFIP Backup a Base Export ☐ Export ☐ TDO-Traffic

#### Step 2

Connect your data logger to the office PC via ActiveSync.

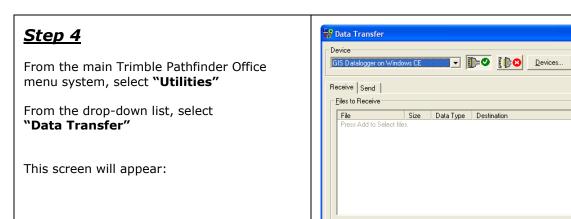

Connected to GIS Datalogger on

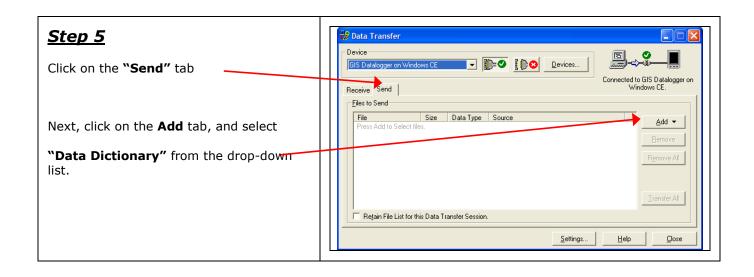

Settings...

<u>H</u>elp

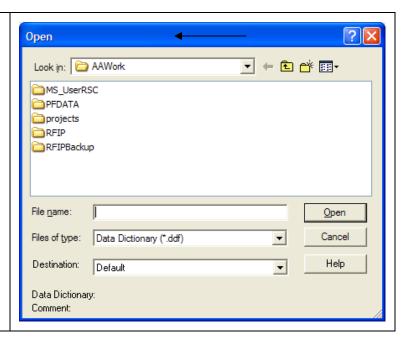

<u>A</u>dd ▼

Close

The **Open** dialog box will appear:

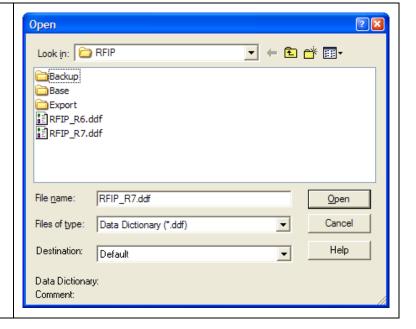

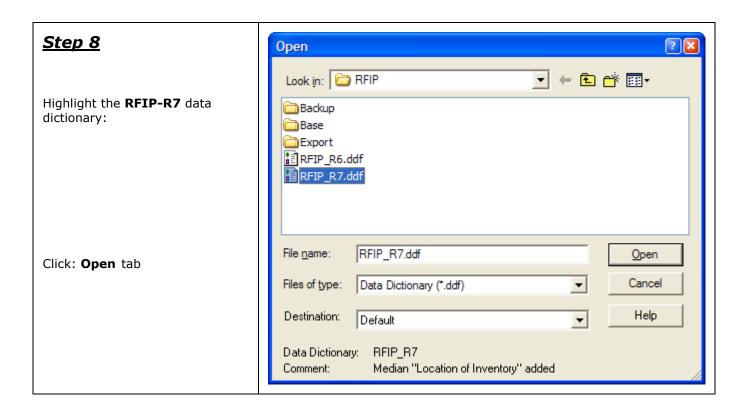

#### Step 7

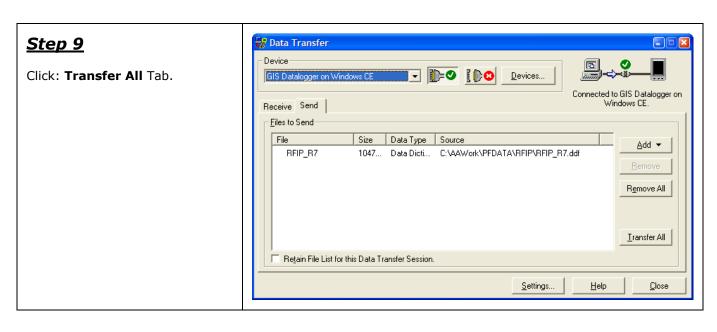

Navigate to the folder where the new data dictionary is stored:

#### C:\AAWork\PFDATA\RFIP

The file should appear as shown here.

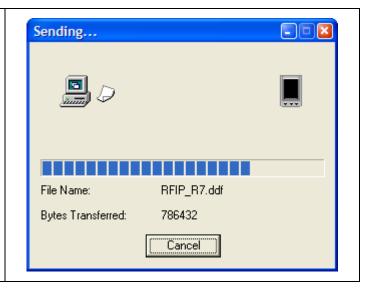

# <u>Step 10</u>

While the file is being sent, you will see this message box.

### <u>Step 11</u>

Click on **"Close"** in this "Transfer Completed" dialog box.

Next, open "  $\textbf{TerraSync}^{\prime\prime}$  on the Geo XH Data Logger.

#### Step 13

Go to the "Data" section.

# <u>Step 14</u>

Go to the "**Dictionary Name**" drop-down arrow, click and select: **RFIP-R7** data dictionary.

Next, delete the **RFIP-R6** data dictionary from the data logger.

From the "**Data**" section, click on the sub-menu drop-down arrow, then select "**File Manager**" from the menu.

# <u>Step 16</u>

From the field **"Choose File Type"** open the pull down menu called **"Dictionaries"** 

# Step 17 Highlight "RFIP-R6" dictionary. **Trimble** 0 Ŷ # **4**€ 1:39 Maria Terra Sync Data 🔻 🗞 Manager | ▼ Options\* Choose File Type: Dictionaries Location: Default Start Time Name Size ADA-R1 03/26/09 04:2... 01/20/06 03:0... 10 KB 06/21/09 07:5... 1 MB 08/25/09 01:1... 1 MB Seaview New RFIP\_R7

### <u>Step 18</u>

Click: "Options" button and select "Delete".

#### Step 19

Enable "Terra Sync" software "Repeat" function" and the "Log Later" function for data collection.

Create a new data file in TerraSync, , select the "Options" tab, then from the drop-down list click on the **REPEAT** function and the **LOG LATER** function.

Click on the "options" button again to make sure the "Repeat" button has a check mark next to it and the "Log Later" option has a bullet next to it.

#### These 20 steps have:

- Transferred RFIP-R7 data dictionary file (.ddf) to your workstation computer
- Transferred the .ddf file to data logger
- Performed steps to make the RFIP-R7 the default data dictionary for all new files created
- Deleted the retired data dictionary from the field unit
- Activated the "Repeat" and "Log Later" functions
